This permit is issued subject to existing rights. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level. This well shall be equipped with a two (2) inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins or before the Proof of Completion				
of Work is filed. This Permit does not extend the permittee the right of ingress and egress on public, private or corporate lands. No perforations shall be put in the production casing from ground level to 100				
The total combined duty of water under Permits 43721, 43722, 43723, 43724, 43725, 43726 and 43727 shall not exceed 27 million gallons annually. The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal, and local agencies. (CONTINUED ON PAGE 2)
